# COMMUNITY MEMO: SUMMER UNIFORM

## 13TH MAY 2025

Dear Families

As the weather is (finally) starting to get warmer, we are adjusting our uniform policy for the comfort of our students whilst still insisting on high standards.

- From this week we will be collecting ties to keep safe. These will be saved by each Head of Year and students will not have to wear them. These will be issued back when we revert to normal uniform. This means students can have their top button open should they wish (no more than this).
- Shirts are to always be tucked in whilst in the Academy because we instill what 'looking professional' means in readiness for their future careers. We also value high standards and the importance of what pride in self and education means.
- Should your child wear short-sleeved shirts, please ensure you equip them with sunscreen to prevent harmful UV skin damage.
- Students are not permitted to wear any shorts or jogging bottoms under their uniform. This is to ensure consistency and as part of our health and safety protocol and measures.
- Remember – our students are lucky in the fact that we supplied them with free uniform this year.

Thank you in advance and your support is appreciated.

*The Newsome Family*

# COMMUNITY MEMO: NON-UNIFORM DAY

## 24TH MAY 2025

### Dear Families

On the last day of term, Friday 24th May, we will be having a non-uniform day. Should students wish to come in non-uniform, they are to bring £1 with them which will be collected at the beginning of the day.

Monies raised will be going directly back to students and their experiences - particularly for our wildlife and social area. Our initial plans are to expand and develop our outdoor space to students can enjoy more outdoor areas and learn about wildlife – particularly our fishpond and nature zone.

*The Newsome Family*

gcsepod  
education on demand

**PROVEN TO INCREASE GRADES!**

STUDENTS SHOULD BE ON THIS  
EVERY EVENING...

## PARENTS' GUIDE TO GCSE REVISION

This useful guide lets you know exactly how and when your child should be revising

“

The highest achieving students  
each watched on average  
**102 Pods**  
so there is a clear correlation  
between GCSEPod and results.  
Principal

”

### CREATE A PLAYLIST

Identify the areas which are most  
challenging and create a playlist  
to focus learning

“

Our top users exceed their  
target grades in many areas.  
Principal

”

**73%**  
of videos are  
watched out  
of school

“

I cannot emphasise enough how  
important it is that GCSEPod be  
used all year round, not just for  
revision, for maximum impact.

Parent

”

**20 MINUTES**

Little and often is best, so try to  
keep sessions around 20 minutes  
to get the best results

“

It's the best thing you can have  
to revise and make sure you  
are ready for the exam.

Student

”

**WATCH 10 PODS PER WEEK**

During exam time aim to watch 3 Pods per day

“

GCSEPod played an important  
role in helping me achieve A\*. I  
would definitely recommend it.

Student

”

# STUDENT VOICE

## UNIFORM DURING WARM WEATHER

- Shirts are to remain tucked in during warm weather. Staff will allow certain adaptations in lessons.

## TOILET PASSES

- Students are to manage their time appropriately so they don't limit their learning and plan their toilet breaks at social times.

*Hearts & Minds  
Voice Box*

# THIS WEEK'S SEMINAR

© Republishing for schools

Fury as sewage makes beauty spot a green soup

*Swamp: Toxic algal blooming on Lake Windermere (above in August 2022) is caused by treated and untreated sewage.*

# THIS WEEK'S SEMINAR

Is this a new great stink? Millions of litres of raw sewage were illegally pumped into England's most famous lake. Amid widespread pollution, some recall a grim summer in the Victorian era. The terrible smell from the River Thames had made the new Houses of Parliament almost uninhabitable. In a desperate attempt to keep it out, the curtains had been soaked in **chloride of lime** (A chemical often used for bleaching.). According to *The Times*, **MPs** (Members of Parliament.) MPs are elected to represent people in 650 different geographical areas.) who ventured into the library “were instantaneously driven to retreat, each man with a handkerchief to his nose”.

The smell came to be known as “the great stink”. Sewage had been building up in the river for centuries; the summer of 1858 brought a heatwave which caused it to ferment. The result was what **Benjamin Disraeli** (A 19th-Century politician who was Britain's first and only prime minister of Jewish origin). called “a **Stygian** (Extremely dark and gloomy. Relating to the river Styx, the river of the underworld.) pool reeking with **ineffable** (Something that cannot be expressed in words.) and unbearable horror”.

Along with the smell came disease. Over the previous 25 years, cholera outbreaks had claimed over 30,000 lives.<sup>2</sup> A grim cartoon in **Punch** (Also known as *The London Charivari*, a British satire magazine published between 1841 and 1992.) showed a skeleton rowing up the Thames. The horrific pong impelled MPs to pass a new law in record time.

The Metropolitan Board of Works was given a huge £3m budget to construct a new sewage system. Under its chief engineer, Joseph Bazalgette, 82 miles of new sewers were built, some of them bigger than the tunnels for the Underground. *The Observer* called it the “most extensive and wonderful work of modern times.” The great stink was over, and the threat from cholera receded.

# THIS WEEK'S SEMINAR

The background of the slide features a composite image. On the left, there is a portrait of a man in a dark suit and white shirt, looking towards the camera. To his right and extending across the top is a photograph of a large, modern bridge with a complex steel truss structure, likely the London Bridge. Below the bridge, there is a photograph of a row of multi-story brick buildings, possibly in a city like London. The entire background is overlaid with a semi-transparent grid pattern.

Today London still depends on Bazalgette's system, even though its population has trebled.<sup>3</sup> Extreme rainfall caused by climate change has strained it further. Now river pollution is raising new fears for public health. Before March's Oxford and Cambridge Boat Race, the rowers were warned to take extra care because of high levels of **E. Coli** (**Escherichia coli is a large group of bacteria. Many are harmless, but some can cause sickness.**) in the water.

The problem is not confined to the capital. This week, the **BBC** (**The British Broadcasting Corporation is the UK's national broadcaster.**) revealed that millions of litres of raw sewage were pumped illegally into Lake Windermere in the **Lake District** (**A mountainous area of northwest England. It contains the country's largest natural lake, Windermere.**) in February. United Utilities failed to report the incident for 13 hours. Previous sewage discharges into the lake have caused it to turn green and maybe even toxic, as phosphorus builds up and algae blooms.

According to the Environment Agency, only 16% of surface waters in England achieved good ecological status in 2023. For Northern Ireland the figure was 31%, for Wales 40% and for Scotland 61%. In England, raw sewage was released into rivers and seas for over 3.6 million hours over the past year — more than double the figure for the previous 12 months. The worst rivers affected were the Irwell and its tributary the Croal, which flows through Greater Manchester.

Water companies are allowed to make such releases in extreme weather conditions to stop sewers being overwhelmed. They say the increased figures are down to heavier rainfall. But campaigners say that many releases are happening illegally because sewage works are not operating properly. They claim that water companies have not spent enough money on maintaining the system. Thames Water has faced huge criticism for paying hundreds of millions of pounds to shareholders which could have been invested in **infrastructure** (**The basic systems and services that a country needs to keep it going.**), and then threatening customers with higher bills to pay for it. But Scottish Water, which is publicly owned, has also been responsible for a huge number of sewage spills. In April last year, the government announced a new plan to improve water quality. It included unlimited fines for companies which broke the rules on dumping sewage.

The background of the slide features a collage. On the left, there is a portrait of a man in a dark suit and tie, looking towards the camera. To his right and slightly behind him is a photograph of a large, multi-arched bridge, likely the Clifton Suspension Bridge, spanning a body of water. Below the bridge, there is a photograph of a row of multi-story brick buildings, possibly a residential or commercial street in a city. The entire background is overlaid with a semi-transparent orange filter.

# THIS WEEK'S SEMINAR

## Is this a new great stink? Nasal invasion

- **Yes:** The amount of sewage being discharged into rivers and the sea is appalling. The improvements needed to the infrastructure will involve years of building work and cost billions of pounds.
- **No:** Sewage treatment plants are becoming more sophisticated all the time. Much of the Victorian infrastructure still works extremely well — it just needs its capacity to be increased.
- **Or...** The situation would be better if it *were* the great stink — then politicians would have to take urgent action. Because a lot of people never think about rivers, it is not considered a pressing issue.

# TEACHING & LEARNING AT HOME

## HANDWRITING

At Primary School, handwriting is drilled into students. They have targets to get their 'pen license' and then have one Teacher that takes them through their learning whilst keeping a close eye on development.

When children enter Secondary School, they have numerous Teachers all teaching to specific curriculum sequence. Each Teacher having different expectations, depending on their curriculum area. It can be more difficult to have one central source of monitoring.

At Newsome Academy, we acknowledge the importance and benefits of that good handwriting has. It shows; your attitude to learning, pride in self and opens doors in your future careers. We mustn't accept those age old sayings of 'well... I never had good handwriting'.

I have included some resources to use for your child at home and to further support opening as many doors as possible for our children. Please use these to support our children to improve their handwriting.

These for ALL years and shouldn't be seen as Primary School activities.

## Positive Affirmation Handwriting Practice

I can be anything I  
want to be when I  
grow up.

Practice Time!

water water  
flower flower  
sun sun  
camp camp  
picnic picnic

Copy this out in the spaces below in your best writing

The date goes at the top of my page and underlined with a ruler.

I always check my Teacher comments in green and respond in purple.

Presentation in my work is highly important so that I can demonstrate my attitude to learning.

# ATTENDANCE ATTITUDE TO LEARNING
